System or product?

Certification of Company Management Systems

A complete service that brings to the system certification in compliance with the chosen standards (i.e. ISO9001, ISO14000) successfully and within the established times. Through personalized contacts, with precise time and economical goals, the main phases are:

- † Free initial check-up
- † Individuation of the strategy
- † Analysis of the site and of the environmental aspects/impacts

- † Compilation of the necessary documentation (manual, procedures, forms)
- † Compilation of the Environmental Declaration for the registration of the Site according to the Regulations EMAS
- † Training, involvement and sensitisation of all the employees on the use of the system

- † Supervision of the internal inspections according to UNI EN ISO 19011:2003
- † Management of the relationships with the third-party certification authority
- † Assistance during the various phases of Certification Checks done by the authority
- † Integration of the Systems ISO 9001 – 14001 – OHSAS 18001

Product Certification

The management system of a company is unique, therefore the integration of systems is extremely important

The product certification is the process aimed at assuring the conformity of products (and services) with the requirements established by technical rules (compulsory certification) and/or technical laws or comparable documents (voluntary certification). The security and quality marks represent the visible guarantee that the product was built in conformity with all the security requirements, verified by a impartial third-party authority that, not only

puts the product through all the tests provided by the reference regulations, but also puts the production under a periodical and constant surveillance. Cartesio Studio supports the client's company in the activities of:

- † CE marking
- † IMQ marking
- † UL marking

- † EU community directives
- † Food product certification
- † Die certification

Management System for the Security of Information BS7799

In the Internet era the protection of Information, true company good, is extremely important

Information represents a good that is getting more and more vital for every organization and therefore its protection and security have a prime importance in business.

Cartesio Studio srl suggests and supports the implementation of the standard BS7799 a rule passed by the British Standard Institution for the management and the security of information. We support the organization

during the entire process:

- † Definition of the field of application
- † Risk analysis
- † Risk management
- † Individuation of the necessary controls
- † Drafting of the "Statement of Applicability"

- † Management of the relationships with the certification authority
- † Compliance with the law as it stands (i.e. D.Lgs. 196/2003)

Corporate Governance

In the interest of whom is the company managed and how is it consequently organized? The attitude of responsible entrepreneurs starts from (but do not wears itself out into) the integral respect of the ensemble of rules that safeguard the interests of the stakeholders and that are originated by absorbing EU directives and international conventions on environment, health and security (626/94), corruption (231/01), etc. and the national legislation. Cartesio Studio srl assure its clients criteria and tools to assure the continual creation of

Value, strategic effectiveness and management efficiency in the full respect of the rules.

- † Prearrangement of a methodological frame that allows a coherent and controlled execution of each activity
- † Improvement of the decision-making process, of the planning and of the definition of priorities
- † Contribution to a more effective use/allocation of capital and resources inside

the organization

- † Protection and strengthening of the corporate assets and corporate image
- † Development and support of the people and of the knowledge bases of the organization
- † Activity of risk management also aimed at legislative conformity (i.e. D.Lgs. 231/2001)

Strategy and tactic to win daily the challenge of markets

SA8000 Ethic-Social Management Systems

Advanced management systems provide the satisfaction of the needs of the interested parties (collectivity, employees, clients, etc.). In this way the organization can confront with the Social Accountability SA8000. Our methodology offers organizations the chance to do the following:

- † Analysis in compliance with the applicable law

- as it stands
- † Drafting of the necessary documentation
 - † Drafting of ethic codes for the supply chain
 - † Ethic-social audit by second-party
 - † Integration with pre-existing management systems
 - † Assistance during the various phases of the

Certification Checks done by the authority

The respect of the law as it stands goes through Company Management

Company Management and Management Training

Today all organizations agree on the valorisation of interdependencies and integration between company processes. For this reason, developing those management competences relating to an integrated and cross vision of corporate processes and to a management culture that is oriented to inter-functionality and is capable of enhancing the assets of relations between persons and organization becomes today fundamental.

- Cartesio Studio srl suggests:
- † Targeted management analysis
 - † Targeted formative courses
 - † Occupation, incentive and widening
 - † Knowledge management
 - † Supervision of files for

- † financing on regional, national end European funds
- † Internationalization of the company

Cartesio Studio srl offers itself as an able partner for the achievement of organizational solutions "ad hoc", combining the pre-existing aspects of a Quality Management Systems with those specific of other systems.

With the aim of obtaining undoubted advantages from the global management of the Company System

Cartesio Studio srl
is a guarantee of success
